# SCHOOL OF INFORMATION TECHNOLOGY
## Illinois State University

CLASSROOM EXPERIENCE

Class sizes are small, most having no more than 30 students, which allows students to get to know professors and interact with them personally. The school has also invested heavily in virtual labs, allowing students to work from anywhere with an internet connection.

FIELD EXPERIENCE

The Fall Internship Fair gives IT students a chance to meet representatives from over 20 companies looking to recruit for summer internships. Most of our students complete paid internships in their field which often lead to job offers from those companies upon graduation.
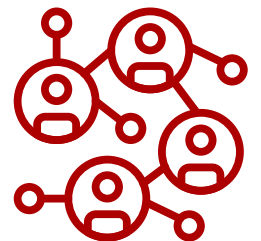

STUDENT ACTIVITIES

Student organizations drive the activities available to IT students. Clubs generally meet weekly online or in-person. Special events kick-off the year and celebrate and award achievements throughout and at the end. These events include the Picnic on the Quad, Cyberforce Competition, Mobile Application Development Contest, and the Commencement Brunch.

RSO'S AND SPECIAL INTEREST GROUPS

Students have the opportunity to join their choice of several Registered Student Organizations and Special Interest Groups. No prior knowledge is needed to attend or join! These groups include: Web Dev Reds, Women in Technology, Game Dev, AI Club, ISUSec, the Association for Computing Machinery, and the Association for Information Technology Professionals.
